

awake

FAST-FORWARDING THE FUTURE OF ELECTRIC WATER SPORTS

Awake

The new era of electric water sports.

Our products are designed for **High Performance** – fits beginners as well as the most advanced riders. Made for anyone who relentlessly would like to challenge oneself.

Ease of Use at our core – intuitive features are deeply rooted in the development process, from the full deckpad to the Awake app. Time spent setting up your board is time you could be spending on the water enjoying it.

Engineered for a **Safe Ride** – multilayered safety through electronic and mechanical features. The battery is designed and produced according to the highest safety standards and thoroughly tested.

Awake RÄVIK S 22

IT'S A RUSH

Awake RÄVIK S 22 / **It's a RUSH**

Discover your extreme

Charge the senses. Feel everything more vividly, more intensely.

Compelling you to go back for more. To challenge yourself on every run. To push yourself further.

Jumping higher, turning sharper, riding faster, feeling everything. This is you, like never before.

That thing in your chest? That's your heart pounding. This is a wake-up call for watersports. Because the new RÄVIK S has arrived.

And **it's a RUSH.**

Awake RÄVIK S 22 / **What's new**

The **Instant Response** time of 0,02 seconds between board and rider allows perfect timing for turns and tricks. The Speed Controller is fully redesigned for more performance and durability, providing 100% control in the water.

The Awake RÄVIK S 22 achieves **Higher Accelerations** than ever due to the increased torque reached by significantly optimizing the impeller shape – wider base and steeper blade angle.

To match the benefits of the instant response, acceleration, and grip – overall **Superior Power** is delivered by the electric motor, keeping the highest performance and control during the ride.

Awake RÄVIK S 22 / **What stays**

The complex **W-shaped hull** of the RÄVIK S has been kept, its high-efficiency profile is now challenged by the new features. Awake riders will enjoy hydrodynamic performance provided by the steep rocker, slim tail and deep channels.

Awake's **Linear Jet System** is thrusting the RÄVIK S 22. Providing a consistent, predictable drive thanks to an unmatched grip below the water and flow in the system, even in the most choppy conditions.

All Awake boards in the world are powered by the Awake **Battery**, so is the RÄVIK S 22. Our Team Riders recommend the XR battery for a perfect match with your RÄVIK S boards.

Awake RÄVIK S 22 / Specifications

Top speed:	57 kph / 36 mph
Acceleration:	0 – 50 kph / 30 mph in 4 sec
Throttle response:	0.02 sec
Range variations:	SR* and XR**
Weight (SR):	39 kg / 86 lb
Weight (XR):	43 kg / 95 lb
Riding time (SR):	Up to 20 min
Riding time (XR):	Up to 45 min
Charging time (SR):	1 h 20 min
Charging time (XR):	2 h 00 min
Rider modes:	ECO, SPORT, EXTREME
Dlmentsions (L/W/B):	175 x 61 x 27 cm / 69” x 24” x 11”
Guarantee:	24 months (EU standard)

*SR – Standard–Range battery
**XR – Extended–Range battery upgrade
