AIR (Inflatable) Get pump

Smaller cost. Big payoff.

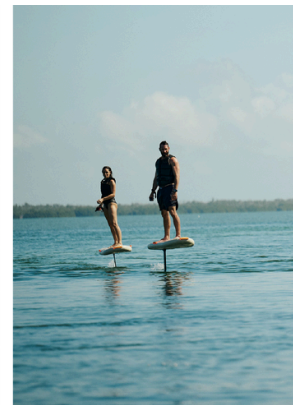

AIR delivers an affordable entry into the world of eFoiling without compromising on quality or performance. Lightweight and durable, it's the perfect choice for beginners and casual riders looking to elevate their water adventures.

AIR's revolutionary construction combines a rigid foam-core platform for a steady and responsive ride, with a reinforced inflatable outer section that helps keep weight and cost down, and durability up.

Board details	KG	LBS	MEASUREMENTS	LITERS
AIR PRO	11	24.3	1580 L x 647 W x 110mm D (5'2" x 25 1/2" x 4 5/16")	80

Race (Carbon) A new era of speed

Engineered for high speeds and flat water racing.

The world's fastest Fliteboard has been precision-engineered to take you from start line to podium, reaching top speeds of 34mph. Nothing else looks or performs like it. The perfect choice for competitive riders looking to break records on flat water. We collaborated with the performance experts at Mercury Racing to design a custom RACE impeller for power, precision and flawless control. With a sleek, low-drag profile, signature rosso stripes on Carbon Innegra and an integrated tail kicker, RACE will have you feeling every inch a racer.

Board details	KG	LBS	MEASUREMENTS	LITERS

Flite x Marc Newson Limited edition

Pure design. Pure performance.

A masterpiece of form and function, this exclusive collaboration with world-renowned designer Marc Newson combines iconic aesthetics with cutting-edge eFoil technology. Designed for peak stiffness, performance and longevity, it's formed with the most advanced Japanese high modulus pre-preg (HMPP) carbon fiber. The 15.2mm / 0.6" tapered monocoque mast stretches down from the board, incorporating the motor-integrated fuselage and tail in an exquisite single flowing form without joints, seams or bolts, for greater hydrodynamic efficiency and stability.

Board details	KG	LBS	MEASUREMENTS	LITRES

Cruiser 1800C

€830

Beginner

The Cruiser wing is our largest wing and prioritizes stability, enabling early foiling at slower speeds. Cruiser 1800 C suits Flitescooter, beginners, heavier riders and those looking for our most laid-back ride. Most popular with Flitescooter.

Cruiser Jet 1500C

€830

Beginner - Intermediate

With excellent takeoff, lift and stability, this Cruiser Jet wing is one of our most popular. It provides excellent performance at low to moderate speeds, including carving or even riding small waves powered-off. It's one of our best all-round wings. Most popular with ICON.

Flow range 900 C

€810

Intermediate - Advanced

The smallest and most radical of the Flow range, Flow 900 C provides a loose and responsive ride at high speeds. Excellent for playful carving in flat water and bigger waves.

Flow 1100 C

€810

Intermediate - Advanced

More efficient and less responsive than the equivalent Flow S wing, Flow 1100 C gives you a loose ride for playful carving and freeriding in flat water, or powered-off wave riding. This versatile wing lets you ride waves, or ride rivers like a wave. Most popular with RACE.

Flow S range S1100C

€810

Intermediate - Advanced

For slow speed riding with a snappy feel, choose Flow S 1100 C. Even more responsive than its equivalent Flow wing, it's perfect for playful carving, freeriding in flat water and powered-off wave riding.

Flow S range S1300C

€830

Intermediate - Advanced

Catch waves, ride slow and make wild turns with Flow S 1300 C. The Flow S range is the lower aspect version of the Flow range, with increased roll rate for a crazy loose ride. Also suits heavier riders and lower speeds. Most popular with ICON and PRO (progression).

MN 1300 C

€830

Beginner - Advanced Designed with input from world-famous designer Marc Newson, this conical wing blends the friendliness of the Cruiser Jet wing with increased performance. The versatile and high-performance MN 1300 C suits intermediate and advanced riders, as well as lighter weight beginners. Most popular with PRO and Flite x Marc Newson.

FLITELab*

Designed with surf and wing foilers in mind, these FLITELab* mid-aspect ratio wings offer a surf orientated ride, with exceptional carve and rail-to-rail performance. The conical interface creates a super streamlined and hassle-free connection to the mast, first time, every time. Also compatible with all Fliteboard Series 5 and Series 4 MN and Performance eFoil. Most popular with ULTRA L3 and RACE

Leading the charge

From the world's smallest, lightest lithium-ion eFoil battery, to 2.5hrs of ride time, our Flitecell range uses the same advanced cells found in electric hypercars, with a proven safety record.

Flitecell Nano

Flitecell Nano is the world's smallest and lightest lithium-ion eFoil battery. Positioning it closer to the mast contributes to minimal swing weight, for the most responsive and agile ride.

Foil time up to 45 minutes
Weight: 6.2kg / 13.7lbs

€2.000

Flitecell Sport

Flitecell Sport is for the sports enthusiasts wanting a fast and responsive ride. It's the most popular choice and sits in the middle of our range in terms of weight and foil time.

Foil time up to 1.5 hours
Weight: 10.6kg / 23.4lbs

€2.300

Flitecell Explore

Flitecell Explore is our biggest battery. Containing more premium cells for a longer ride. Go further for longer with this innovative design or share the ride with friends and family.

Foil time up to 2.5 hours
Weight: 14.5 kg / 32lbs

€3.300

Fast Charger

Flitecell Fast Charger is 25 Amp. It charges Flitecell Explore in less than 2hrs, Flitecell Sport in less than 1.5 hours and Flitecell Nano in less than 50min. Comes with a carry bag and is compatible with all Flitecells.

€950

Slow Charger

This compact charger is engineered for a low current draw at 6A, making it more suitable for use on boats and camping generators with limited power output.
